

Greenyarn Smart Hiking Socks (**TYRRANO**)

Greenyarn's Smart Hiking Socks are knitted with our 200-needle count densely knit 3-D technology, the dense construction, Y-heel seam and an arch-band ensures superior fitting and to offer a new level of comfort. **Tyrrano** is designed by mountaineers -- tested at the most rugged terrains, **Tyrrano** is most suitable for temperatures around -10°C to 20°C (Mid weight). Containing the finest acrylic yarns at the heel and toe, they are abrasion resistant and quick dry, making these socks durable yet comfortable. Leveraging on nano-technology, Tyrrano are made with **Bio-weave** and **Eco-fabric** and these new materials help the wearer by:

- Fights odors and kills bacteria
- Absorbs and emits far-infrared energy
- Permeable, fast drying and wicks moisture quick
- Provides utmost cushion and reduces blister

What is Bio-weave?

Bio-weave is a highly wicking and quick drying fabric that is embedded with **nano-particles of bio-ceramic** in its fibers.

What is Bio-Ceramic?

Bio-ceramic is a fabric embedded with 26 kinds of ceramic mixed with mineral oxides combined together at 1600 degrees centigrade. After cooling, the composite ceramic absorbs and emits far-infrared energy.

What is Eco-fabric?

Eco-fabric is material embedded with **nano-particles** of activated bamboo charcoal.

Eco-fabric's bamboo charcoal nano-particles comes from Taiwanese Moso Bamboo (*Phyllostachys heterocycla pubescens*), grown naturally in the Jhushan "Bamboo Mountain" region of Taiwan. A renewable resource, a bamboo forest regrows in 4–5 years, while a tree forest takes 60 years. Eco-fabric fights bacteria and fungi and is anti-static.

What is 200-needle count densely knit 3-D technology?

200-needle count densely knitted socks are the densest knitted socks in the world. Unlike other conventional socks which cushions feet for only a few hours, the 200 needle count 3-D knitted terry sole is so dense it could keep the feet cushioned all day even with prolonged wearing and walking, adding more bounce in every step. With the Y-heel seams and arch-band, these socks fit well and stay in place all day during wear, reducing chance of developing blisters.

Tyrrano Care Instructions:

Tyrrano contains Eco-fabric and Bio-weave. To ensure the socks last a long time and retaining all its benefits, please follow the following washing instructions.

- 1) Cold Machine Wash
- 2) No Bleaching
- 3) Do not Wring Dry
- 4) Do not Dry Clean
- 5) Do not Iron

Eco-fabric products properties:

Antibacterial and antifungal
De-odorizing
Breathable and cool
Promotes blood circulation and metabolism
Thermal regulation
Reduce static electricity
Washable
Green
